

(ML-12) Magnelite Electric Match

26ga. solid copper duplex firing wire 12 inches long, 1/16 of an inch wide with approximately 0.042 grams of pyrogen. (image has been expanded 1 1/2 times its actual size)

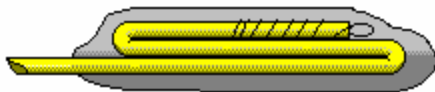

(ML-24) Magnelite Electric Match

26ga. solid copper duplex firing wire 24 inches long, 1/16 of an inch wide with a *single fold* that contains approximately 0.118 grams of pyrogen. (image has been expanded 1 1/2 times its actual size)

(ML-48) Magnelite Electric Match

22ga. solid copper duplex firing wire 48 inches long, 1/8 of an inch wide with a *double fold* that contains approximately 0.273 grams of pyrogen. (image has been expanded 1 1/2 times its actual size)

(ML-72) Magnelite Electric Match

Used by the DOD for disposal of cold war rocket motors such as the MK56. 22ga. solid copper duplex firing wire 72 inches long, 1/8 of an inch wide with a *triple fold* that contains approximately 0.329 grams of pyrogen. (image has been expanded 1 1/2 times its actual size)
